# Smart Store

We are representing you a modern solution of shopping and doing business from your home in a save way as you know that today era is the era of online we can access everything and E-commerce has made a tremendous position in online platform we are giving a solution of all the needs of shopping and and doing business from your home and gives you a a large platform of marketing as well

The project is concerned with e-shop where you can buy and sell everything and do your shopping from your home and gives more benefits from it .It is based on 3 interfaces with web based and application as well. You can search any product from here as well as the business stakeholders can sell any product here and they are capable to advertising of their product in this community

## Project Vision

### Near Vision

The near vision of our product that is based on e-shop is to sure the quality aspect because the main draw back of online purchasing is quality assurance of products so our near vision is to give 100% quality assurance approximately of any product that the customer buy from our store

### Far vision

As we know that today era is the era of advance technology of AI and IOT and much more and we will use in our project.The future vision of our project is based on that

*We deliver our product through drone within 30 minutes and provide warehouse of our Store in every area to make it possible*
